Course-Data Analytics

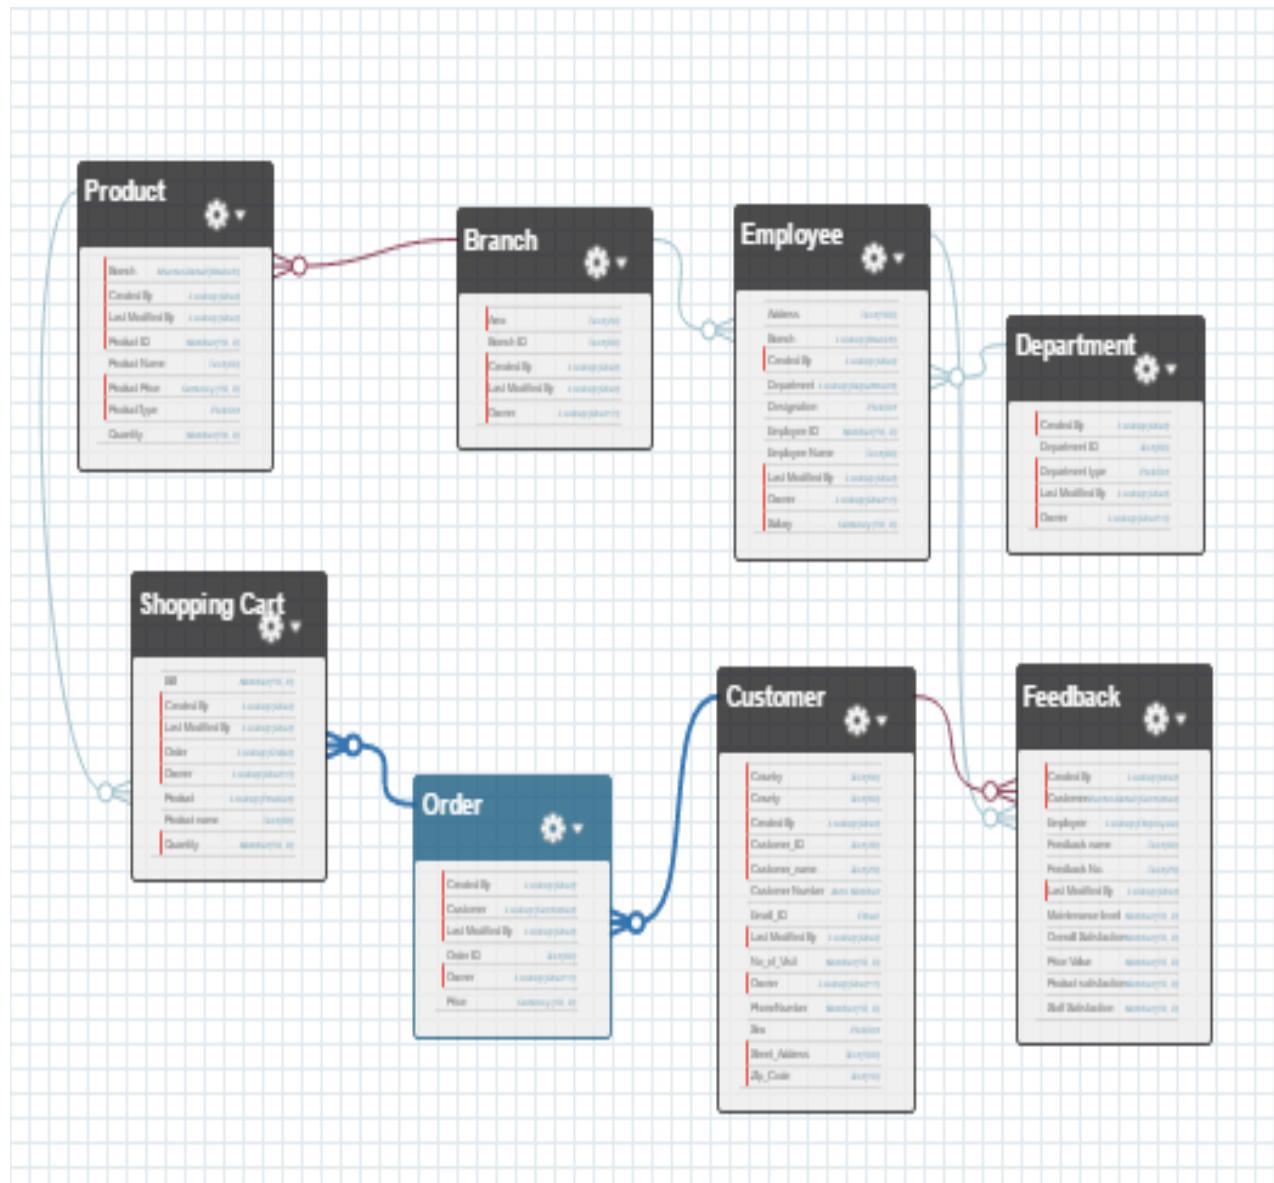

Professor-Ciaran Hayden

Project on
Retail Management System
On
Marks&Spencer

Architecture of Marks&Spencer project:

Schema Builder:

I have built an app on Marks&Spencer retail store which have 7 **customize objects**:

1. **Customer**-users of the products which can order it online or can see the availability of the products in the store.
2. **Department**-different **types** of department in the store
 - 2.1 Sales department
 - 2.2 Human Resource(HR) department
 - 2.3 Security and IT department
 - 2.4 Retail department
3. **Employees**-Staff working in the department
4. **Branch**-Different areas of the product like Parnell street, Mayor street, cork etc.
5. **Product**-Items **available** in the different branches of the store.
6. **Order**-customer ordered products.
7. **Shopping Cart**-products added to the cart and here **bill** gets generated which has to be pay by customer.
8. **Feedback**-Survey or response by customer on: product, maintaince, cost, staff satisfaction and overall satisfaction.

Benefits of retail management application-Shop on click:

- I have made one application on retail management which will save the effort of customer to go to the shop and buy the product,saving the time and cost of transportation as I am giving free home delivery service.
- Feedbacks can help the company to make better decisions and can be customer oriented.
- Its very easy to access the items in the market.A large market can be captured from online selling as people who are setting at the home that are not coming to the store and they are getting the products at home capturing the large market.
- Fast market growth-We can expand the market as fast as the products sell to the customers and we can build the store in the other countries too,hence capturing the world faster.
- Every customer is captured,unbiased.
- Reduced price
- Customer intelligence-targeting new customers by launching new product for every type of needs.
- Covers mostly every type of needs:
 - 1.Clothing and accessories
 - 2.Food and drink items
 - 3.Health and care items
 - 4.Stationary items
 - 5.Liqour items

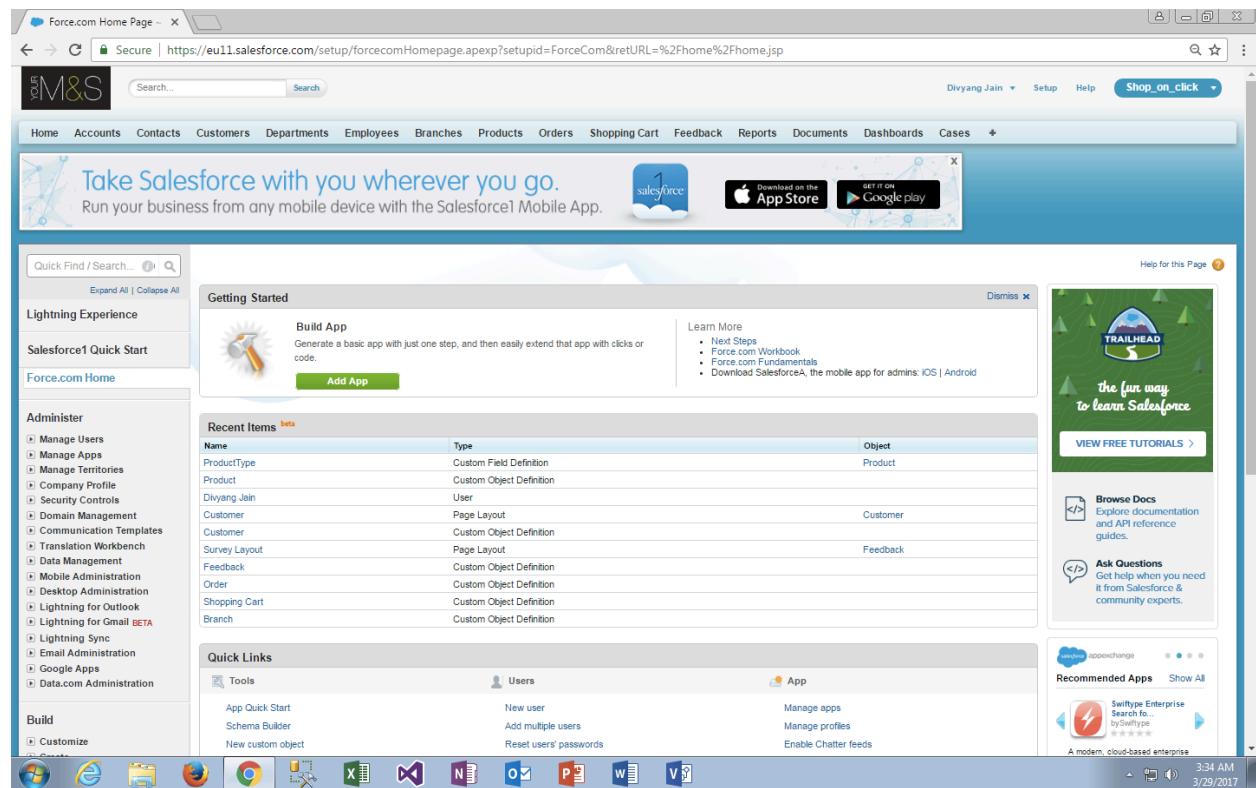

Steps:

1. To create an application first go to

Salesforcepage-setup-build-create-apps-new

Now first app will be build and we can name it with the description.

My application name is **Shop_on_click**.

App
Shop_on_click

Custom App Edit

Save Save & New Cancel

App Label: Shop_on_click
App Name: Shop_on_click

Description: Shop on click in an app which makes easier to track the customer buying items either at the store or online orders.

2.After creating the application second work is to create the objects which are shown above-

Customer,department,employee,branch,product,order,shopping cart,feedback.

Setup-Build--Create--Objects--New Custom Object

Step 1. Choose the field type	
Specify the type of information that the custom field will contain.	
Data Type	
<input checked="" type="radio"/> None Selected	Select one of the data types below.
<input type="radio"/> Auto Number	A system-generated sequence number that uses a display format you define. The number is unique across all records.
<input type="radio"/> Formula	A read-only field that derives its value from a formula expression you define. The formula can include calculations, functions, and references to other fields.
<input type="radio"/> Roll-Up Summary	A read-only field that displays the sum, minimum, or maximum value of a field in a related record.
<input type="radio"/> Lookup Relationship	Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a picklist.
<input type="radio"/> Master-Detail Relationship	Creates a special type of parent-child relationship between this object (the child, or detail record) and another object (the master). <ul style="list-style-type: none">• The relationship field is required on all detail records.• The ownership and sharing of a detail record are determined by the master record.• When a user deletes the master record, all detail records are deleted.• You can create rollup summary fields on the master record to summarize the detail records. The relationship field allows users to click on a lookup icon to select a value from a picklist.
<input type="radio"/> External Lookup Relationship	Creates a relationship that links this object to an external object whose data is stored in a different database.
<input type="radio"/> Checkbox	Allows users to select a True (checked) or False (unchecked) value.
<input type="radio"/> Currency	Allows users to enter a dollar or other currency amount and automatically formats the value.
<input type="radio"/> Date	Allows users to enter a date or pick a date from a popup calendar.
<input type="radio"/> Date/Time	Allows users to enter a date and time, or pick a date from a popup calendar. When users enter a date and time, the time is displayed in the user's local time zone.
<input type="radio"/> Email	Allows users to enter an email address, which is validated to ensure proper format. If the email address is invalid, it cannot be used for mass emails.
<input type="radio"/> Geolocation	Allows users to define locations. Includes latitude and longitude components, and can be used for geocoding.
<input type="radio"/> Number	Allows users to enter any number. Leading zeros are removed.
<input type="radio"/> Percent	Allows users to enter a percentage number, for example, '10' and automatically adds the '%' symbol.
<input type="radio"/> Phone	Allows users to enter any phone number. Automatically formats it as a phone number.
<input type="radio"/> Picklist	Allows users to select a value from a list you define.
<input type="radio"/> Picklist (Multi-Select)	Allows users to select multiple values from a list you define.
<input type="radio"/> Text	Allows users to enter any combination of letters and numbers.
<input type="radio"/> Text Area	Allows users to enter up to 255 characters on separate lines.
<input type="radio"/> Text Area (Long)	Allows users to enter up to 131,072 characters on separate lines.
<input type="radio"/> Text Area (Rich)	Allows users to enter formatted text, add images and links. Up to 131,072 characters can be entered.
<input type="radio"/> Text (Encrypted) 	Allows users to enter any combination of letters and numbers and store them in encrypted form.
<input type="radio"/> URL	Allows users to enter any valid website address. When users click on the field, the URL is copied to the clipboard.

Customer
New Custom Field

Step 2. Enter the details

Field Label [i](#)

Please enter the length of the number and the number of decimal places. For example, a number with a length of 8 and 2 decimal places can accept values up to "12345678.90".

Length [i](#)

Number of digits to the left of the decimal point

Decimal Places [i](#)

Number of digits to the right of the decimal point

Field Name [i](#)

Description

Help Text

Required Always require a value in this field in order to save a record

Unique Do not allow duplicate values

External ID Set this field as the unique record identifier from an external system

Default Value [Show Formula Editor](#)

Use formula syntax, e.g., Text in double quotes: "Hello", Number: 23, Percent as decimal: 0.10, Date expression: Today() + 7

2.1.Repeat the process to create other objects

Setup-Build--Create--Objects--New Custom Object

Custom Objects

Custom objects are database tables that allow you to store data specific to your organization in Salesforce. You can use custom objects to extend Salesforce functionality or to build new application fur

Once you have created a custom object, you can create a custom tab, custom related lists, reports, and dashboards for users to interact with the custom object data. You can also access custom obje

					New Custom Object	Schema Builder
Action	Label	Master Object	Deployed	Description		
Edit Del	Branch		✓	Different locations of stores		
Edit Del	Customer		✓	Consumers or users of the products		
Edit Del	Department		✓	Segments for different sections of people working		
Edit Del	Employee		✓	Staff working in the store		
Edit Del	Feedback	Customer	✓	Feedback from customers		
Edit Del	Order		✓			
Edit Del	Product	Branch	✓	Items in the store		
Edit Del	Shopping Cart		✓	online orders which will be added in this cart and billing process will be done.		
Deleted Objects (1)						

3.After creating all the objects we need to present it on the tabs so for that add objects to tab column.

Build-Create-Tabs-New--Define

3.1 Repeat this step to make other tabs

The screenshot shows the 'Custom Tabs' section of the Salesforce setup. It includes two main sections: 'Custom Object Tabs' and 'Web Tabs'.
Custom Object Tabs: A table listing custom object tabs with their labels and styles:

Action	Label	Tab Style
Edit Del	Branches	Building
Edit Del	Customers	People
Edit Del	Departments	Presenter
Edit Del	Employees	Employees
Edit Del	Feedback	Feedback
Edit Del	Orders	Credit card
Edit Del	Products	Box
Edit Del	Shopping Cart	Shopping Cart

Web Tabs: A table showing no web tabs have been defined.

Action	Label	Tab Style
No Web Tabs have been defined		

4.After creating the tabs it's time to assign fields in the objects.

Build-Create-Objects-new custom objects- enter label,plural ,field name-save-Custom fields & relationships-New-select data type(number,picklist,text,master relation,lookups,etc)-next-enter field label-next-save

Customer number, customer ID, customer name, email ID, no of visit, phone number, sex, street address, country, county fields.

After making the fields I have fetched my data approximately 100 rows for every object.

This website generates dummy dataset.

<http://www.generatedata.com/>

The screenshot shows the generatedata.com website interface. At the top, there is a navigation bar with links for 'Generate', 'About', 'News', and 'Donate'. On the right side of the header, there are 'Login' and 'English' language selection buttons. Below the header, there is a search bar with the placeholder 'Your data set name here...' and a 'SAVE' button. A toolbar with icons for file operations (New, Open, Save, Print, Delete) is also visible. The main content area is titled 'COUNTRY-SPECIFIC DATA' and contains a dropdown menu set to 'All countries'. Below this, there is a table titled 'DATA SET' with 7 rows. The first row has 'Customer ID' as the column title, 'Auto-increment' as the data type, and examples '1, 2, 3, 4, 5, 6...'. It also includes 'Start at: 1', 'Increment: 1', and a 'Placeholder string' input field. Rows 2 through 7 have 'Customer Name', 'Email ID', 'Street Address', 'Country', 'County', and 'Zip Code' as column titles respectively. The 'Data Type' for these rows is 'Names', 'Email', 'Street Address', 'Country', 'City', and 'Postal / Zip'. The 'Examples' column for these rows shows 'John Smith', 'No examples available.', 'No examples available.', 'No examples available.', 'No examples available.', and 'No examples available.' respectively. The 'Options' column for each row includes a checkbox for 'Limit countries to those selected above'. At the bottom of the table, there is an 'Add' button followed by a 'Row(s)' input field.

5. Product

The screenshot shows a Salesforce interface for managing products. The top navigation bar includes links for Home, Accounts, Contacts, Customers, Departments, Employees, Branches, Products (which is the active tab), Orders, Shopping Cart, Feedback, Reports, Documents, Dashboards, and Cases. A search bar and a user profile for Divyang Jain are also present.

The main content area displays a table titled "Product Details" with columns: Action, Product Name, Branch, Product ID, Product Price, ProductType, and Quantity. The table lists 69 items, such as jeans, soups, noodles, wiper, sandwiches, shirt, salads, studs, facewash, pies, Corona, t-shirt, studs, sandwiches, seafood, noodles, Guiness, toothpaste, paracetamol, wiper, t-shirt, salads, salads, salads, seafood, t-shirt, desserts, and shirt. The "Branch" column shows values like 10, 12, 13, 17, 19, and 2. The "Product Type" column includes categories like Clothing and accessories Items, Food and drink Items, Health and care items, and Liquor Items.

On the left sidebar, there are sections for "Recent Items" (listing various users and IDs) and a "Recycle Bin". The bottom of the screen features a taskbar with icons for various applications like Windows, Internet Explorer, Firefox, Google Chrome, Microsoft Word, Excel, and others. The status bar at the bottom right shows the date and time: 4:17 AM, 3/29/2017.

2. Product satisfaction from customers feedback.

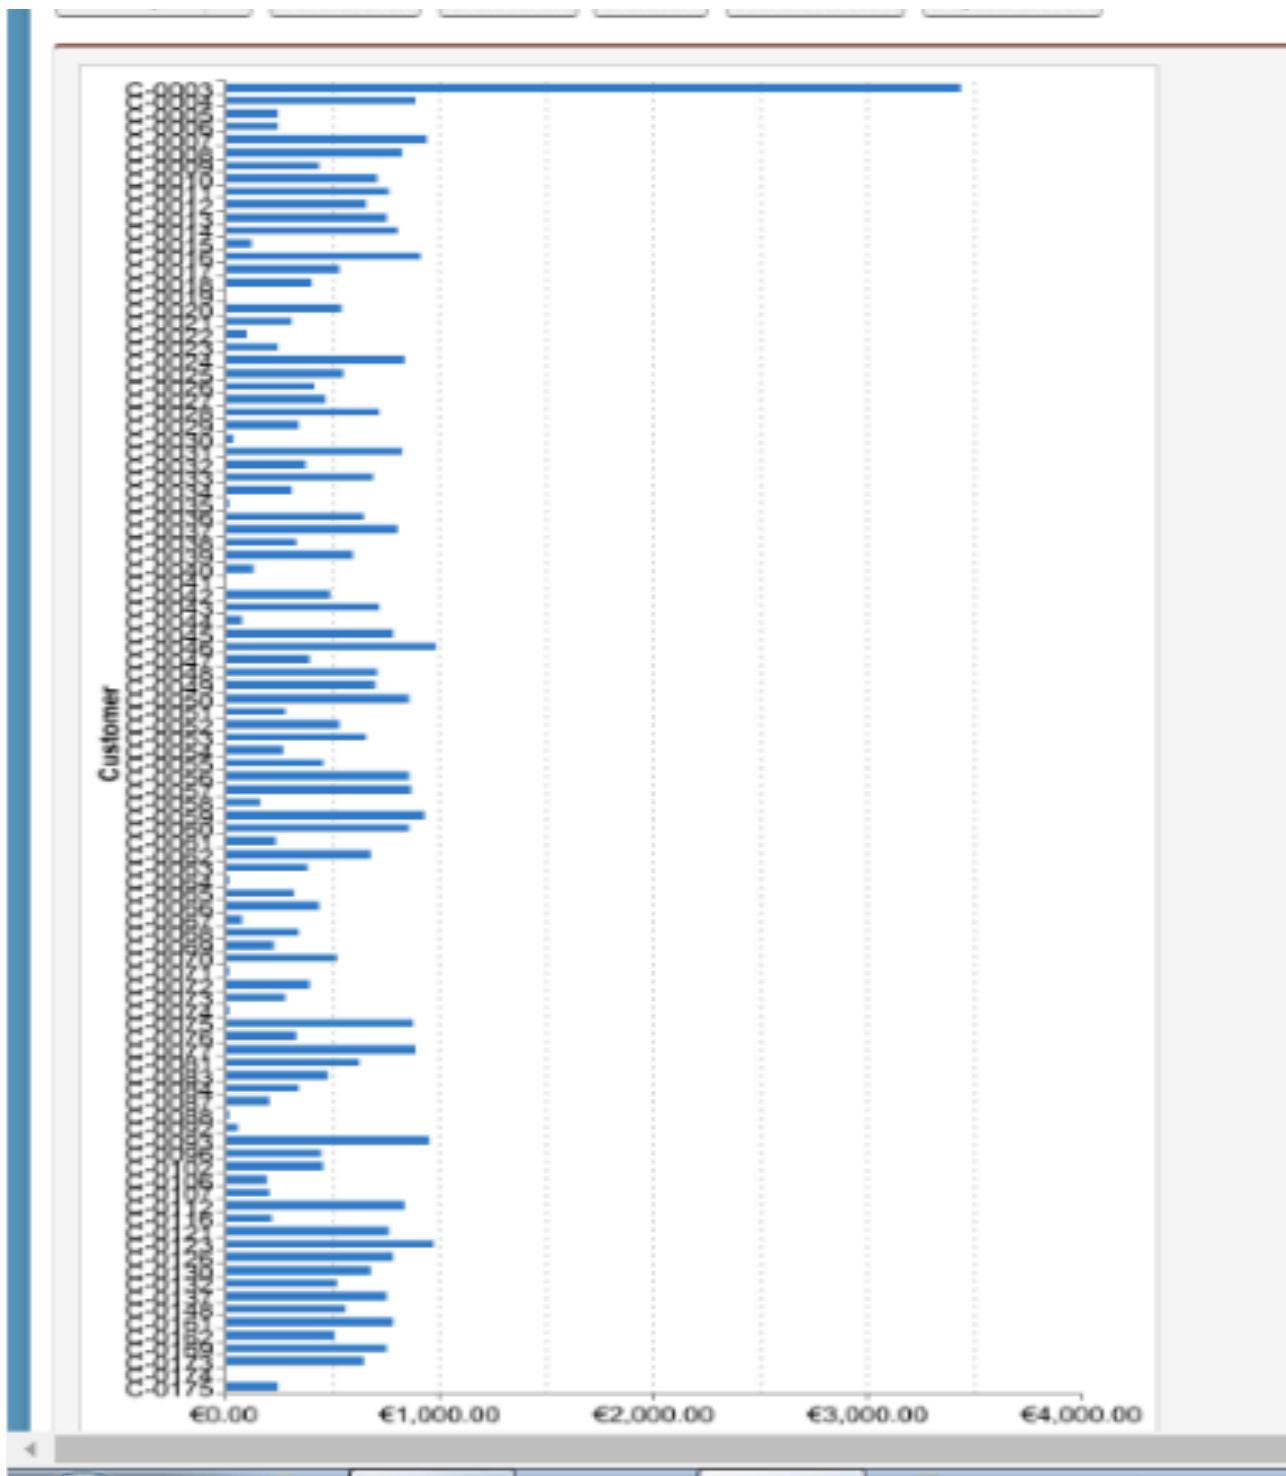

3.Overall Satisfaction

4.Sum of salary in respect of designation and also showing the value of the designation on the top and to lower .(top to lower level)

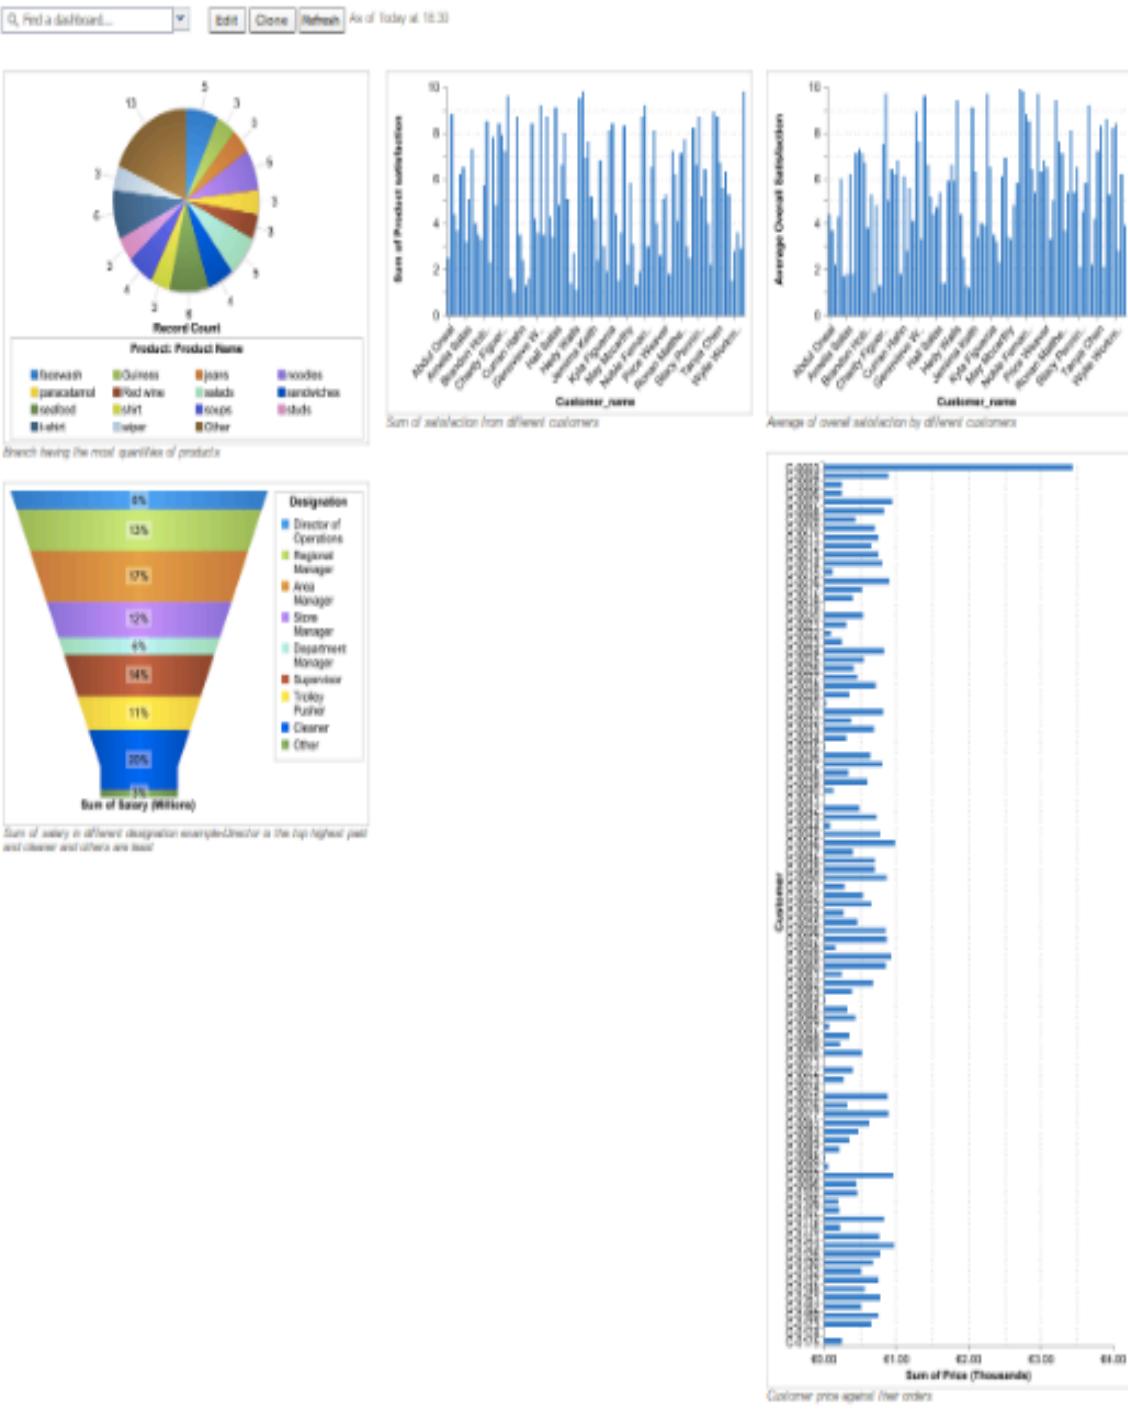

5.Customer price against orders.

Dashboard:

5 reports are shown in the area and for that first add report tab if its not on the tab then click on new dashboards-add five reports to the area-add components like graph,pie chart,line graph,funnel etc-save the dashboard-go to dashboard tab-shown.

Marks and spencer report

I have added in my account too

For that first go to setup-customize-home-edit the layout-tick the dashboard view-save-click on home tab.

The screenshot shows the 'Edit Home Layout' interface in the Salesforce Lightning Experience. At the top, there's a banner with the text 'Take Salesforce with you wherever you go.' and 'Run your business from any mobile device with the Salesforce1 Mobile App.' Below the banner are download links for the App Store and Google Play. The main area is titled 'Edit Home Layout' and shows 'Step 2. Order the components'. It features two columns: 'Narrow (Left) Column' and 'Wide (Right) Column'. In the Narrow column, there are buttons for 'Create New...', 'Tags', and 'Recent Items'. In the Wide column, there are components for 'Calendar', 'Tasks', 'Items to Approve', and 'Dashboard Snapshot'. Each component has up and down arrows to move it between positions. At the bottom right, there are buttons for 'Previous', 'Save & Assign', 'Save', 'Preview', and 'Cancel'. A 'Save' button is highlighted. On the left side, there's a sidebar with sections for 'Lightning Experience', 'Salesforce1 Quick Start', and 'Force.com Home'. Under 'Force.com Home', there's a 'Administrator' section with various management options like 'Manage Users', 'Manage Apps', etc.

Case associated with URL(Webpage)

Case(webpage) I have made for customers where customer can login if salesforce is not working and there will be queries which will be saved and I have made some cases to show.

For that:

Go to setup-customize-self service-web to case HTML generator

Capturing Case Information from Your Website

Using pre-existing pages on your company's website, you can capture contact and case information from user requests.

Capture Cases

Select the fields to include:

Available Fields	Selected
Company	Contact Name
Type	Email
Status	Phone
Case Reason	Subject
Priority	Description
Engineering Req Number	
SLA Violation	
Product	
Potential Liability	

NOTE: Would you like to add custom fields to your website. [Tell me more.](#)

Visible in Self-Service Portal

Enter the URL that the user will be returned to:

URL

Enable spam filtering (recommended) [?](#)

reCAPTCHA API Key Pair [?](#) [Get API Key](#)

Enable server fallback [?](#)

Generate **Cancel**

Capturing Case Information from Your Website

Using pre-existing pages on your company's website, you can capture contact and case information from users and automatically create new cases in salesforce.com, enabling you to requests.

Capture Cases

Copy and paste the sample HTML below and send it to your webmaster.

```
<!-- -----
<!-- NOTE: Please add the following <META> element to your page <HEAD>.
<!-- If necessary, please modify the charset parameter to specify the
<!-- character set of your HTML page.
<!-- ----- -->
<!-- -----
<!-- NOTE: Please add the following <FORM> element to your page.
<!-- ----- -->
<form action="https://www.salesforce.com/servlet/servlet.WebToCase?encoding=UTF-8"
method="POST">
<input type=hidden name="orgid" value="00D0Y000001dLTg">
```

Finished

I have entered the URL for Marks&Spencer site where customer will be directed to the site-next-copy the format and save it to notepad in dot html form-run that file.

Custom Links

Up-sell / Cross-sell Opportunity

The screenshot shows a Salesforce Case record. At the top, there's a navigation bar with links: Customers, Departments, Employees, Branches, Products, Orders, Shopping Cart, Feedback, Reports, and Document. Below the navigation bar, the Case Number is 00001027 and the Created Date is 28/03/2017 19:49. To the right, there are status details: Status (New), Priority (Medium), and Case Owner (Divyang Jain). The main content area has tabs for Feed and Details, with Details selected. Below the tabs is a toolbar with options: Post, Email, Log a Call, Change Status, File, and More. A note from the user says, "Hi Salesforce team, i can't login any longer? can you please assist." On the left, there's a sidebar with "All Updates for this case" and a search bar. The first update is from Divyang Jain, created yesterday at 19:49. The update content includes the subject, priority, status, and case number. On the right, there are sections for Followers (none), Topics (none), and Custom Links (Up-sell / Cross-sell Opportunity).

Go to cases if its not in home tab then customize that and add in tabs-we can see there are some cases regarding the problem of site.

Email Generation

I have added one email feature if some customer have some issue and he/she sends one query to salesforce it will automatically send that mail to that customer.

Setup-customize-cases-email to case-save

Example:

Thank you for submitting your question to us online. Case #00001030: "Orders" has been created and a NCI Customer Advocate will get back to you within the next 24 hours.

▼ Message Content

Subject	Your Order
Text Body	Congratulations Haley Clay Your Order is confirmed. You will get your product in 3-4 days Regards Divyang Jain

Powered by Salesforce
<http://www.salesforce.com/>

Account:

Add this into the tab if its not there from customize the tabs from + sign.

Click on new to add new account then add the details-save.

Account will be saved and will show the case related to it.

The screenshot shows a Salesforce account page for 'HaleyClay'. At the top, there's a feed section with a 'Hide Feed' button, a search bar, and social sharing icons. Below the feed is a 'Post' button, a 'File' button, a 'New Task' button, and a 'More' dropdown. A 'Share' button and a 'Followers' section (which is currently empty) are also present. The main content area is titled 'Account Detail' and contains various account information fields. At the bottom of this section are 'Edit', 'Delete', and 'Include Offline' buttons. Below the account detail is a 'Contacts' section with a 'New Contact' and 'Merge Contacts' button, and a 'Phone' link. There's also a 'Customer' contact entry with the name 'Haley Clay' and email 'gape10@yahoo.com'. The bottom part of the page shows tabs for 'Opportunities', 'Cases', 'Open Activities', 'Activity History', 'Notes & Attachments', and 'Partners'.

Contacts:

Add this into the tab if its not there from customize the tabs from + sign.

Click on new to add new contacts then add the details-look up from parent account-save.

The screenshot shows the Salesforce mobile application interface. At the top, there's a banner with the text "Take Salesforce with you wherever you go." and "Download on the App Store" and "GET IT ON Google play". Below the banner, the navigation bar includes links for Customers, Departments, Employees, Branches, Products, Orders, Shopping Cart, Feedback, Reports, Documents, Dashboards, Cases, and a plus sign for customization. The main content area displays a contact record for "Mr. Jane Austin". The contact's name is at the top, followed by social sharing icons (Twitter, Facebook, LinkedIn). Below that is a feed section with a "Post" button, "File" button, "New Task" button, and a "Share" button. A text input field says "Write something...". To the right of the feed is a "Follow" button and a note that says "No followers.". Below the feed is a search bar and a link to "Show All Updates". The "Contact Detail" section follows, containing fields for Contact Owner (set to "Divyanshu Jain [Change]"), Name ("Mr. Jane Austin"), Account Name ("Jane Austin"), Title, Department, Birthdate, Reports To ("View Org Chart"), Lead Source, Mailing Address ("108 mayor street dublin 1,dublin ireland"), Languages, Created By ("Divyanshu Jain, 28/03/2017 19:53"), and Description. On the right side of the detail section, there are columns for Phone (Home Phone, Mobile, Other Phone), Fax, Email, Assistant, Asst. Phone, Other Address, Level, and Last Modified By ("Divyanshu Jain, 28/03/2017 19:53"). At the bottom of the detail section are "Edit", "Delete", "Clone", and "Request Update" buttons. The footer of the screen shows a "Opportunities" link and a "New Opportunity" button.

Now our application is built customers can send the mails,price of the products,online orders easily by just sitting at their home.

That's why the name of the application of Marks&Spencer is Shop on click.

"BRINGING NECESSITIES TO YOUR HOME EASILY"
